Azalea Indica.

I can mention no greater recommendation for my Azaleas than the universal satisfaction given my customers, who are always satisfied with the quality, price and my judgment in the assortment of varieties. During the season of 1899, which was one of my largest shipping years, I received many complimentary reports regarding the quality of my Azaleas sent out, without receiving a single complaint.

I am one of the largest cultivators of the leading varieties and I am now booking orders for fall delivery. I give **customers choice** of varieties, but when choice is left to me I send only popular sorts and kinds **best suited** to the american trade.
